Professional Summary:

Motivated MCA graduate focused on Data Science and Data Analytics with hands-on experience in Python, SQL, Excel, Power BI, data cleaning, exploratory data analysis (EDA), data visualization, statistical analysis, and machine learning. Experienced in analysing datasets, identifying trends and patterns, building predictive models, evaluating model performance, and developing interactive dashboards. Strong foundation in Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, MySQL, PostgreSQL, and Streamlit. Seeking an entry-level Data Analyst, Data Scientist, or Data Science & Analytics role.

Technical Skills:

Programming & Querying: Python, SQL, Java, C

Data Analytics: Data Cleaning, Data Preprocessing, EDA, Data Analysis, Data Interpretation, Trend Analysis, Statistical Analysis, Data Validation, Feature Engineering

Business Intelligence: Power BI, Dashboard Development, Data Visualization, Excel, Pivot Tables, VLOOKUP/XLOOKUP, IF, SUMIF/SUMIFS, COUNTIF/COUNTIFS

AI & Machine Learning: Machine Learning, Deep Learning, CNN,

Regression, Classification, Model Training, Model Evaluation, Predictive Modeling, NLP

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, OpenCV, TensorFlow/Keras, Matplotlib, Seaborn, Streamlit

Databases: MySQL, PostgreSQL

Tools: VS Code, Jupyter Notebook, Git, GitHub

Projects:

1. AI-Based Forest Fire Risk Assessment System

- Developed a predictive model to assess forest fire risk using environmental data and machine learning algorithms.
- Performed data preprocessing and analysis of environmental factors to support risk assessment.
- Technologies used: Python, Pandas, NumPy, Scikit-learn, Machine Learning.

2. Road Accident Analytics and Risk Assessment System

- Developed a data analytics system to analyse road accident patterns and identify risk factors using accident datasets.
- Performed exploratory data analysis, data visualization, trend analysis, and statistical aggregation for weather, vehicle type, and road conditions.
- Implemented Linear Regression to forecast accident trends and estimate risk levels using historical data.

3. Smart Housing Price Intelligence System

- Built and deployed a machine learning-based housing price prediction system using Random Forest Regressor, achieving 89% accuracy.
- Performed data preprocessing, feature engineering, model training, and model evaluation to improve prediction performance and reliability.
- Developed an interactive real-time Streamlit dashboard with integrated data visualization for presenting predictions and insights.

4. Music Genre Classification using Machine Learning

- Built a machine learning classification model to classify music genres using structured audio features.
- Performed feature extraction, data preprocessing, model training, and classification using Python and Scikit-learn.
- Technologies used: Python, Scikit-learn, Pandas, NumPy.

5. Music Recommendation System using Facial Expression

- Developed an AI-based computer vision system to detect facial emotions and recommend personalized music.
- Used CNN for emotion classification and applied image processing techniques with OpenCV.
- Technologies used: Python, OpenCV, Deep Learning, Pandas.

Internship Experience:

Data Science and Analytics Intern at Spherenex – February (2026) to May (2026)

- Gained practical exposure to data science and analytics workflows, including data preprocessing, exploratory analysis, visualization, and analytical problem solving.
- Applied Python and data analytics concepts to work with datasets and strengthen data-driven problem-solving skills.

Education:

- Master of Computer Applications (MCA), VTU University (2026) - 9.25 CGPA
- Bachelor of Computer Applications (BCA), RTU University (2023) - 9.50 CGPA
- Intermediate (PUC), Pre University Board (2020) - 81.00%
- Matriculation (SSLC), KSEEB (2018) - 85.44%

Certifications:

- Data Science and Analytics Intern - Spherenex 2026
- Introduction to Artificial Intelligence - Infosys Springboard 2026
- Introduction to Deep Learning - Infosys Springboard 2025
- Natural Language Processing - VTU, Belagavi 2026
- Deshpande Susandhi Fellowship Program - Deshpande Education Trust 2023.

Strengths:

- Strong analytical and problem-solving skills
- Data-driven thinking and attention to detail
- Quick learner and adaptable
- Passionate about Data Science and Analytics
- Team player with good communication skills
